With Supplement 1860*1900

Compiled by

ABERDEEN UNIVERSITY PRESS
M-CM-XXXV
The Roll of the Graduates of the University of Aberdeen 1860-1926 was published in 1906 at the time of the University Quatercentenary Celebrations. That work contains an alphabetical list of the 4,360 graduates from 15 September 1860 (the date of the fusion of the University and King's College of Aberdeen and the Marischal College and University of Aberdeen) until the close of the nineteenth century.

The suggestion that Colonel Johnston’s Roll should be continued so as to cover the first quarter of the present century was first mooted in a letter from Mr. J. M. Bulloch, M.A., LL.D., which appeared in the Aberdeen Press and Journal in the summer of 1925. Subsequently, on 8 September 1925, Dr. Bulloch wrote a letter on the subject to Mr. P. J. Anderson, M.A., LL.B., Clerk of the General Council. Mr. Anderson submitted this letter to the Business Committee of the Council, and at its half-yearly meeting in October 1925 the Council adopted a recommendation from the Business Committee that it should represent to the University Court the desirability of taking steps for the preparation and printing of a supplement to Colonel Johnston’s Roll to cover the quarter-century 1901-1925. A few weeks later the Court authorized the preparation of a supplementary Roll of Graduates and appointed Mr. Alexander Macdonald, M.A.—for many years head master of Durris Crossroads School—to be Editor. Failing health, however, compelled Mr. Macdonald to relinquish the task very shortly after he had undertaken it, and in December 1926 the present Editor was appointed.

In accepting office the new Editor made one stipulation, namely, that in addition to compiling the Roll for 1901-1925 he should be authorized to revise the Roll for 1860-1900 and bring it up to date. The Court very readily agreed to this proviso, and it was accordingly decided that the new Roll should consist of two main parts—the first and larger part to be complementary to Colonel Johnston’s Roll, containing a brief record of all who graduated between 1 January 1901 and 31 December 1925; and the second part to be supplementary to Colonel Johnston’s Roll, containing the names, with additional annotations, of all graduates entered in that Roll and not recorded in it as having died.
PREFACE

An outline of the contents and arrangement of the present Roll may now be given.

SECTION I (1901-1925)

Section I contains the names of 4,539 men and women on whom 6,070 degrees were conferred between 1 January 1901 and 31 December 1925 (see Appendix B). The information regarding each graduate is set forth in the same general style as in Colonel Johnston's Roll, but is amplified. The most complete arrangement of an entry is as follows:

(1)—Full name of the graduate, with degree or degrees, diploma or diplomas received from the University between the dates just mentioned.

(2)—Name and occupation of the graduate's father or guardian, place and date of the graduate's birth, and address at time of entering the University—all as recorded in the University albums. When it is known that the father was a graduate of any University or an alumnus in Arts of King's College or Marischal College, this information has been inserted within square brackets, as have also any other additions to the official University records. It may be mentioned that in some cases these records do not give the exact place of birth, but only the parish.

(3)—Honours, including Honours in the Great War; degrees or diplomas granted by other Universities or Colleges, or by the University of Aberdeen after 31 December 1925; and Fellowships of various Royal Colleges and Royal Societies (e.g., F.R.C.P., F.R.C.S., F.R.S., etc.). Membership or Licence of any of the Medical or Surgical Corporations is not, as a rule, recorded.

(4)—A note indicating the career of the graduate. Except in special instances no reference is made to the published writings of graduates, and no reference is made to the holding of a University Examinership. In the case of medical graduates, it is to be understood that, unless otherwise stated, the localities noted indicate the spheres of their practice, but places in which they remained for only a short time are not generally recorded. As a rule, no mention is made of honorary posts at hospitals and infirmaries, as information about these is accessible in The Medical Directory. With very few exceptions service in the Great War is not recorded, this having been dealt with definitively in the University of Aberdeen Roll of Service in the Great War 1914-1918, edited by Mabel Desborough Allardyce (published in 1921). In every case where a graduate is entered in the Roll of Service a reference is given in this Roll (e.g., R. of S. p. 162). In connexion with the deaths of graduates, references are given to obituary notices in The Aberdeen University Review (e.g., A.U.R. IV, 91).
PREFACE

(5)—Condensed particulars of marriage. On pp. 661-682 is an index of the married names of women graduates in this Section, with the corresponding maiden names.

Section I concludes with the Roll of Honorary Graduates 1901-1925. These (both D.D.s and LL.D.s), for convenience of reference, are arranged not chronologically but in one alphabetical series. It has been deemed unnecessary to annotate the list extensively, as many of the graduates are of national and even international reputation, and information about them is readily available. Brief notes have, however, been added within square brackets in the case of local recipients not otherwise dealt with in Section I or in Section II, and in the case of a few recipients who have been specially associated with the University.

SECTION II (1860-1900)

Section II, as already stated, takes the form of a supplement to Colonel Johnston’s Roll for the period 1860-1900, and is intended to be read in conjunction with that Roll. Of the 4,360 persons dealt with by Colonel Johnston, all who were not recorded by him as having died, numbering 3,280, appear in this Section. As a rule, only the names and the degrees of these graduates are repeated from the last Roll, but in some cases additions or corrections with regard to birth, parentage, etc., have been made within square brackets. Then follow brief annotations on the lines of those in Section I, similar references being made to R. of S. and A.U.R.; but in Section II marriages are not recorded, except in the case of twelve of the women graduates. Honorary graduates will be found in their alphabetical place in the supplement.

In appendices at the end of the volume are given (1) statistics and analyses relating to both Sections of the Roll, and (2) a detailed analysis of degrees and diplomas granted by the University during the first quarter of the present century. The volume closes with a List of Subscribers.

A comparison of the present with the previous Roll discloses a number of differences. The outstanding one is that whereas in the period 1860-1900 there were only 21 women graduates (apart from two who were made LL.D.), there were in the period 1901-1925 no fewer than 1,627. This led to an important decision. It was agreed that the marriages of women graduates would have to be recorded, as in many cases marriage was the outstanding, if not, indeed, the only event in their careers deemed by the graduates themselves to be worthy of mention. In view of this, it was also agreed that it would be only fair and fitting that an effort be made to record the marriages of the men graduates as well, and applications for information about these met with a much readier response than had been anticipated. While the Editor is aware
PREFACE

that in a good many cases information that might have been supplied has not been supplied, there are recorded in Section I of the Roll the marriages of 1,818 men and 748 women—a total of 2,566, being over 56 per cent, of the number of graduates in the period 1901-1925. From the alphabetical list of married women graduates which is printed near the end of Section I, it will be found that 237 women graduates have been married to men graduates of the University, and from the records of these marriages throughout the Section it will be seen that a large number have, very appropriately, been solemnized in King's College Chapel.

Another noticeable difference between the two Rolls is the fuller information about individual careers given in the present one. The Editor hopes that its extended scope will add not a little to its permanent value as a work of reference.

Perhaps something may now be said regarding the Editor's modus operandi. On commencing work in January 1927 he found that, as the result of representations made in 1914 by the General Council to the University Court, there was in existence in the University a complete card-index of all students who had matriculated since 1891. His first step, therefore, was to select, check, and arrange the cards relating to all the graduates in the quarter-century 1901—1925, and to prepare and arrange another set of cards with copies of the individual entries in Colonel Johnston's Roll. The work of annotating the entries about those graduates in the period 1860-1900 who were known to have died since 1906 was started in the autumn of 1927, and while this was going on, inquiry forms relating to both Sections of the Roll were being prepared. These forms, numbering 6,315, were sent out in March 1928 to the addresses given in the Register of the General Council, and within the next few months some 4,400 came back with the desired information; but over 500, for one reason or another, were not delivered, and in all no reply to the first appeal for information was received from about 1,900 graduates. As soon as the inquiry forms were returned, an assistant began the writing on slips of the biographical annotations for Section I of the new Roll, and the Editor continued to annotate the 1860-1900 entries.

In the autumn of 1928 the card-index for the period 1901-1925 was placed in the printers' hands, in order that the entries (apart from annotations) might be put into type. Early in 1929 the annotating of Section II had practically been completed, and the Editor then turned his attention to Section I, dealing first with those graduates about whom no information had so far been received. As a result of this work a second set of inquiry forms, numbering 948, was sent out, and of these about 450 came back with information. At the beginning of 1931 the work was completed of checking and revising the annotations for Section I prepared by the Editor's assistant from the returned inquiry
forms, but there remained much to be done in the way of tracking the very considerable number of graduates whom the Editor had still been unable to reach, or from whom, at any rate, no reply had been received, and of adding to the existing annotations supplementary information' from various sources.

In the course of 1931 Section II was put into type, and the proof-reading and revising of this occupied the early months of 1932. The editorial work on Section I had meantime so far advanced that it in turn was put into type in 1932-33, and the revising in detail of the galley-proofs was completed in February 1934.

In the spring of 1933 a prospectus of the Roll was issued to every graduate, and attached to it was a form for additional information. Graduates were thus given the opportunity of supplementing information previously supplied and of bringing the entries up to date. From these forms came much welcome material for further annotations. Throughout 1934 the work of reducing the number of the unannotated steadily progressed, and at last, in January 1935, the two Sections of the Roll, which had been kept in a "fluid" condition until the work of annotation had been done as completely as possible, were made up into pages, and from that time until the writing of this Preface the proof-reading and revision of sheets for final printing have proceeded almost continuously. It may be of interest to record that the preparation of the Roll from start to finish has occupied approximately 2,100 hours of the Editor's "spare" time.

As has been usual in the compilation of Rolls such as this, the work has taken considerably longer than was anticipated. It was at one time hoped that the record of the graduates of the first quarter of the present century would be published before the second quarter had advanced far, but the compilation has extended over wellnigh nine years. Although the delay in publication may have been disappointing, it has not been without advantage, for it has given time for the later graduates to settle in their occupations as now recorded in the Roll.

When comparing his work with that of his predecessor, Colonel Johnston, the Editor is grateful that, while he has had a very much larger number of graduates to deal with, he escaped the initial drudgery of copying the entries from the University albums, and also that much more biographical material was readily accessible. In this connexion he would express his great indebtedness to the invaluable Personalia and Obituaries that have been a feature of The Aberdeen University Review since its inception in 1913, and to Miss Allardyce's Roll of Service in the Great War. For much helpful information about the medical graduates in the period 1860-1900 the Editor has to thank Emeritus-Professor William Bulloch, M.D., LL.D., F.R.S., formerly of the London Hospital.
PREFACE

To the annotating of a Roll of living persons there is no finality, and to some extent the Roll must be out of date even before it is published. In the present instance the closing date for annotations was fixed at 30 June 1935, and the statistics in Appendix A have been compiled as at that date; but space has been found to record some events that have taken place while the sheets have been passing through the press. In a book of this kind, compiled intermittently over a long period, errors of omission and of commission and variations in style of recording and of typographical presentation are almost inevitable. For all such the Editor offers his apologies in advance.

NOTES

When no University is indicated after a degree or diploma, it is to be understood that the degree or diploma was granted by the University of Aberdeen.

A date in parentheses in an annotation indicates that what is stated was the case in the particular year mentioned: e.g., "Resident in Perth, Western Australia (1935)." With reference to an appointment it does not indicate when that appointment was first received.

In many cases where a minister of the United Free Church of Scotland was appointed to a charge before the union of this Church with the Church of Scotland and continued in the same charge, the original name and not the subsequent name of the charge has been recorded.

Diplomas in Agriculture and in Forestry have been recorded only when awarded to Graduates of the University.

#### Notes on the Table
1. This Table has been compiled from the Abstracts of Reports as to Statistics under "The Universities (Scotland) Act, 1889," § 30, printed annually in the Aberdeen University Calendar.
2. In the reckoning of M.A. with Honours there have been excluded those who, having taken the Ordinary Degree, subsequently took an Honours Degree, also those who, having taken Honours in one group (consisting of a subject or subjects), subsequently took Honours in another group. The Table shows the number of individuals who have been granted the various Degrees.
3. During the quarter-century 25 men and 12 women who had taken the Ordinary M.A. Degree, subsequently took Honours in one group of subjects, during the same period 13 men and 4 women took Honours in two groups.
4. Men and three women who had taken the Ordinary B.Sc. Degree, subsequently took Honours in one subject; and one man who had taken the Ordinary B.Sc. (Agr.) Degree, subsequently took Honours in one subject.
5. The granting of the Degree of D.Phi, was discontinued in 1920, and the title of D.Litt. was granted in lieu thereof.
6. In the Table the numbers (in italic figures) in the "With Honours" columns are included in the immediately preceding "Total" columns.
